

# How to make an origami frog

Materials needed? Sheets of A4 paper, paint or crayons or felt tips for colouring.

Using one sheet of A4 paper, fold it as shown on the first image and cut out the excess paper in order to get a square.

Fold it diagonally and in horizontally (you should get folds as shown on the picture 4).

Working in partnership

Fold in the horizontal fold (as seen in the picture 1) so that it is aligned with the centre.

Fold the corners (as seen in picture 2 and 3) and fold them again as seen in picture 4 & 5.

Flip the frog over and start folding the legs.

When you are done with the legs flip the frog again. It should be looking pretty cool by now. Now to make it jump you will have to fold it back and forth – the black lines show where you should be folding the frog – the line on the right being a fold back and the one on the left fold forward.

The last folds – the distance between them make a huge impact on how the frog jumps (or doesn't) so be sure to make more than one and give them a test run!

For some extra bling you can decorate the frogs with glitter glue, googly eyes, sequins...
