

NEW! For 2020 Winter - Summer Term

What's on? Sessions at the Animal Education Centre

Key Stage 2 (age 7 - 11 years)

Science and Maths: Beneath the Surface

See animals like never before - with X-ray vision! Children will be able to take a closer look at animal anatomy and explore the differences and similarities between bone structures. Does anything look familiar? In this session we will take an introductory look at evolution and animal groups.

Science and Design: Happy in my Habitat

This multi-activity workshop allows the children to discover what different animals need to survive and thrive. They will also investigate ways in which they can help attract wildlife to green spaces and actions needed to help protect them. Together they will build either a bug hotel OR a bird box to be used in their school. Small hammers and nails will be used.

Key Stage 3 (age 11 - 14 years)

Science and Design: Happy in my Habitat

This multi-activity workshop allows the children to discover what different animals need to survive and thrive. - and what they don't. They will also investigate ways in which they can help attract wildlife to green spaces and actions needed to help protect them. Together they will build either a bug hotel OR a bird box to be used in their school. Small hammers and nails will be used.

Science and Maths: Beneath the Surface

See animals like never before - with X-ray vision! Children will be able to take a closer look at animal anatomy and explore the differences and similarities between bone structures. Does anything look familiar? We will also examine finer details and explore anatomy through the microscope. In this session we will take a look at evolution, adaptation and animal groups.
