

Water Safety at Home

FACT: People can drown in just 2cm of water

Make sure anything containing water in your home is emptied after it's used and make sure an adult is always with you.

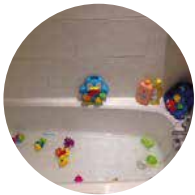

Can you match these household hazards with the action you could take to make it safe?

Fishponds

Cover with a secure lid

Children should not be left playing unsupervised in these, empty and put away after use

Baths

Water butts

Empty after use and remove the plug

Children should be supervised at all times, empty and remove the plug after use

Washing machines

Paddling pools

Check these are empty after use and store away from children

Wash basins

Buckets

Keep the door shut at all times

Fence these off and cover with mesh
